

# MATURA

CREATING COMFORT

MATURA ÖKOSTAR series washing machines  
Capacity 8 /9/10 kg 1400 RPM  
MATO1508/MATO1509/MATO1510

The new Ökostar is Sleek, modern, and technologically advanced, this class-A energy-efficient washing machine is an optimal appliance for couples and families. Featuring an 8,9,10 kg capacity, a maximum spin speed of 1400 rpm, a standard cycle time of 218 minutes, and a wide range of wash programs, it guarantees to return all your laundry fresh and clean

## programs and feature

### Efficient and Quiet

Matura ökostar washing machine will make open plan living a lot more peaceful. Since we've all spent a lot more time at home over the past few years, we may be more in tune with the background noises, which seem to fill our homes – Matura works so anything we could do to lower the decibels in our household would be a welcome addition.

With an A grade for energy consumption, this machine goes a step further and offers load detection. This measures the load you've added and makes sure it uses just the right amount of water, so none gets wasted.

### Ornate Crystal Drum

A new ökostar MATURA Ornate Crystal Drum pattern provides greater protection for your laundry and gently washes your clothes.

The special feature of the drum is its strength and reliability under constant loads and temperature extremes.

It's a completely new drum design that provides greater washing protection while gently washing your laundry.

It is made from an ornate crystal drum containing high quality mix of plastic and stainless steel.

It works almost silently and is economical.

### Serene BLDC Drive Motor

The Serene Inverter Motor is energy efficient, powerful and quiet. The new generation of Matura washing machines ensures efficient operation with this technology. Compared to induction motors, Serena BLDC drive motors in washing machines produce less heat, which results in less electricity consumption and greater efficiency. By using the Serena BLDC motor-driven washing machine, we save on your electricity consumption compared to a conventional motor-driven appliance.

## specification

Energy Efficiency Class	A
Power Supply	220-240V/50Hz
Max. Spin Speed	1,400
Volume Of Inner Tub	53L
Standard Cycle Time (ECO40-60)	218
Rated Power (W)	1900
Energy Consumption (kwh/100 cycle)	47
Water Consumption (L)	48
Performance	Anti Foam Control PTC Door Lock Fault Check Display Memory Of Power Interrupt Steam
Noise Level dB(A) Wash	62dB
Noise Level dB(A) Noise	76dB
PROGRAMS	Mix, Super Quick, Wool, Shirt, Bedding, Bedding, Sportswear, Cotton, Prewash, Spin ECO40-60, Delicate Drum Clean Steam program
Temperature	Cold-20-30-40-60-95
power on delay start mode	4.0W
off mode power	0.5W
Weight	61KG
Dimensions	595*520*850
